EddyVision 7.2 Release Notes
September 13, 2012

These release notes document all changes from Rev 7.1 to Rev 7.2.

Warning: **Projects and files created and/or modified with Rev 7.1 can not be read with earlier versions.**

1. General

1.1. Misc bug fixes.

2. DBMS

2.1. Fixed bug with alias queries.

2.2. Fixed bug with macros in stored queries.

2.3. Added ability to use macros in UPDATE/DELETE queries.

2.4. Improved query parameters dialog. Use online help for details.

2.5. Display number of records affected by update queries. If you attempt to rollback the changes by hitting **Cancel**, it will prompt you to make sure.

2.6. Added **View | Query History** to SQL and Query dialogs.
