

EddyVision 7.2 Release Notes

September 13, 2012

These release notes document all changes from Rev 7.1 to Rev 7.2.

Warning: Projects and files created and/or modified with Rev 7.2 can not be read with earlier versions.

1. General

1.1. Misc bug fixes.

2. DBMS

2.1. Fixed bug with alias queries.

2.2. Fixed bug with macros in stored queries.

2.3. Added ability to use macros in UPDATE/DELETE queries.

2.4. Improved query parameters dialog. Use online help for details.

2.5. Display number of records affected by update queries. If you attempt to rollback the changes by hitting **Cancel**, it will prompt you to make sure.

2.6. Added **View | Query History** to SQL and Query dialogs.
